with Jay Arcemont, CAM, Vice President of Operations, FlightWorks

"It definitely helped me get my current position. I'd been a captain for many years, and I'd earned my MBA recently, but the CAM did factor in. It helped put my resume at the top of the pile."

DAVID THATCHER, CAM
Director of Aviation, Glazer's

THINKING ABOUT MANAGEMENT?
Become a CAM.

DEDICATED TO HELPING BUSINESS
ACHIEVE ITS HIGHEST GOALS.

CERTIFIED AVIATION MANAGER

Committed to Excellence,
Prepared to Lead

www.nbaa.org/cam/info

STEP UP TO A LEADERSHIP ROLE

The Certified Aviation Manager (CAM) program identifies qualified professionals to lead departments and organizations that use business aviation aircraft. The CAM credential acknowledges professionals committed to continuous development and higher standards of practice.

The certification process tests your knowledge and experience in five subject areas:

- Leadership
- Human Resources
- Operations
- Technical and Facilities Services
- Business Management

CAMs are professionals who have demonstrated an exemplary level of industry knowledge and expertise. These men and women are committed to excellence and prepared to lead.

HOW CAM WORKS FOR YOU

Who is interested in your CAM credential?

- Employers
- Peers
- Passengers
- Business leaders
- Crew members

As a CAM, you can prove that you have met the industry standard and that you have the potential to be a successful flight department manager.

Additional benefits of becoming a CAM:

- Industry-recognized title that earns you a seat at the table of business aviation leaders
- A tool to help current managers begin a succession program for recognizing future leaders
- Added motivation to continue your professional development and stay at the top of the industry
- Access to a network of industry professionals to help you succeed

Certification is an objective, third-party review of standards designed to protect the interests of all stakeholders in business aviation management. It demonstrates that you are prepared to move into a position within an aviation department as a result of extensive study and preparation.

Earn your CAM credential and distinguish yourself from the rest.

CAM is accredited by the National Commission for Certifying Agencies (NCCA). Accreditation by the NCCA demonstrates to the business aviation profession and the general public that the CAM program has been reviewed by a panel of impartial experts and found to comply with the rigorous NCCA standards. The CAM program is the first in the aviation industry to receive this credential.

NEXT STEPS

Those interested in becoming CAMs must meet certain qualifications in order to take the exam. The exam is appropriate for any individual currently managing, or aspiring to manage, any aspect of business aviation operations.

Prepare for the Exam

- Take NBAA Professional Development Program (PDP) courses
- Participate in industry events, training classes and study groups
- Review the CAM Study Guide

Apply for the Exam

- Find the application at www.nbaa.org/cam
- Have at least two years' industry experience
- Have a minimum of 100 points in the CAM application

Take the Exam

- Find your nearest computer-based testing center at www.isoqualitytesting.com
- Contact NBAA to schedule the exam
